

## Environment Policy

Airservices is a provider of safe, secure, efficient and environmentally responsible services to the aviation industry. We are committed to improving the environmental sustainability of our organisation while facilitating improved environmental outcomes for our customers and stakeholders.

We will proactively work with aviation industry stakeholders to protect the environment by:

- implementing innovations that ensure the environmental efficiency of our services;
- working with airlines and other stakeholders to minimise aircraft emissions;
- promoting and supporting the principles of Ecologically Sustainable Development in our operations in order to minimise our environmental footprint and prevent pollution;
- enhancing environmental management practices through a fit-for-purpose Environment Management System;
- embedding an organisational culture that is environmentally aware; and
- collaborating on initiatives to reduce the environmental impact of aircraft noise and activity.

This will be achieved in a manner that assures we are compliant with applicable legislation, regulation and government policy, and that we maintain a focus on continual improvement.

We will collaborate with our customers and stakeholders in efforts to meet industry and community expectations in regard to our environmental practices and performance.

All staff are responsible for sound environmental management and all managers are accountable for environmental performance in their areas of responsibility.

Sound environmental management is an integral and vital part of the provision of an efficient, effective and sustainable air transport system.
